• Follow the prompts on your screen to finish installing RealtimeDirect. Once installed, the icon for RealtimeDirect will be on your desktop.

Protocol and COM Port Settings

- Select either Bridge or Caseview
 - Eclipse, DigitalCAT, and other CAT systems that can use the Bridge protocol and output using the baud rate 38,400 should choose Bridge.
 - CaseCAT and other systems limited to the Caseview protocol should choose Caseview.

CAT Software Settings

- Open your CAT Software
 - If you have performed the installation steps above and had your CAT software open, please close and reopen your CAT software.
- Configure your output settings for COM 41:
 - Eclipse and other Bridge Protocol users:
 - Open your User Settings.
 - Go to the Realtime tab.
 - Click on the Add button.
 - Choose Bridge as the Output.
 - Make sure that "Apply Edits" is checked.
 - Select COM port and click Setup.
 - On the new window that opens, choose COM 41 as the port.
 - Make sure the baud rate is 38k or 38,400.
 - Click Ok on the COM port setup window.
 - Click Ok on the Output format window.
 - Start a realtime file.
 - CaseCatalyst and other Caseview Protocol users:
 - Go to your Translate window.
 - Double check that your Output To: drop down menu is set to Caseview.
 - Click on Options and then to your Output CaseView tab.
 - Check Output over comm port.
 - Select COM41 from the list.
 - Make sure that Direct (Cable) is select.
 - The virtual COM port connection that LiveLitigation makes is read as a physical cable plugged into the reporter's computer.
 - Click Ok on the Case CATalyst Translate Options Window.
 - Start a realtime file.

Data and Clear Steno

- Check the Data I/O to see if your COM port is setup properly
- Click Clear Steno to delete realtime that was previously-sent.
